The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Masahiro et al. [JP2002280237] in view of Woody et al. [5703462].

Masahiro discloses an ignition coil of an ignition system in an internal combustion engine, comprising: a housing 150; a magnetically active core 110; a first coil winding 120; a second coil winding 130 connected to a high-voltage terminal; and at least one electrically conductive component 110 having, at least in some areas, an arrangement for an electrically effective evening out of its surface (shown Figures 4 and 5b), wherein the arrangement is formed by sheathing 111 which has a smooth surface; wherein the sheathing is extruded; wherein the electrically conductive component is the magnetically active core 110 [Page 2, Paragraph 7-11, Figures 2, 4 and 5b].

Masahiro discloses the instant claimed invention discussed above except for the sheathing is a layer of electrically conductive plastic.

Woody discloses conductive plastics as sheathing layer [Col. 2, Lines 34-37].

It would have been obvious to one having ordinary skill in the art at the time of the invention to use conductive plastics as sheathing layer as taught by Woody.

The motivation would have been to provide EMI shielding on inductive devices [Col. 2, Lines 34-37].

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Masahiro in view of Woody as applied to claim7 above, and further in view of Takeyama et al. [20040108931].

Masahiro in view of Woody discloses the instant claimed invention discussed above except for the electrically conductive component is a peripheral core of a compact ignition coil.

Takeyama discloses an electrically conductive component 106 is a peripheral core of a compact ignition coil [Page 1, Paragraph 4, Figure 13].

It would have been obvious to one having ordinary skill in the art at the time of the invention to use a peripheral core as taught by Takeyama to the structure of Masahiro in view of Woody.

The motivation would have been to contain the magnetic flux density within the device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSELITO BAISA whose telephone number is (571)272-7132. The examiner can normally be reached on M-F 5:30 am to 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
